

Ste. Marie Scramble

Mount your bike after crossing the timing pad and going down the ramp. Turn right onto Silver Street.

Follow Silver across Mac (north border of Park) and continue to Miller Grove. Turn right and follow the curve past Miller Grove/Bird Haven parks, where the road becomes East Street.

Follow East across Mac and continue to Hall. Go left.

Follow Hall to the T at Holly and go right – passing RC Elementary School.

Just after the school, turn left onto Gadde Bridge.

Follow Gadde Bridge to Ste. Marie. The HEVs at the water stop will be happy to provide water before you turn left onto Ste. Marie.

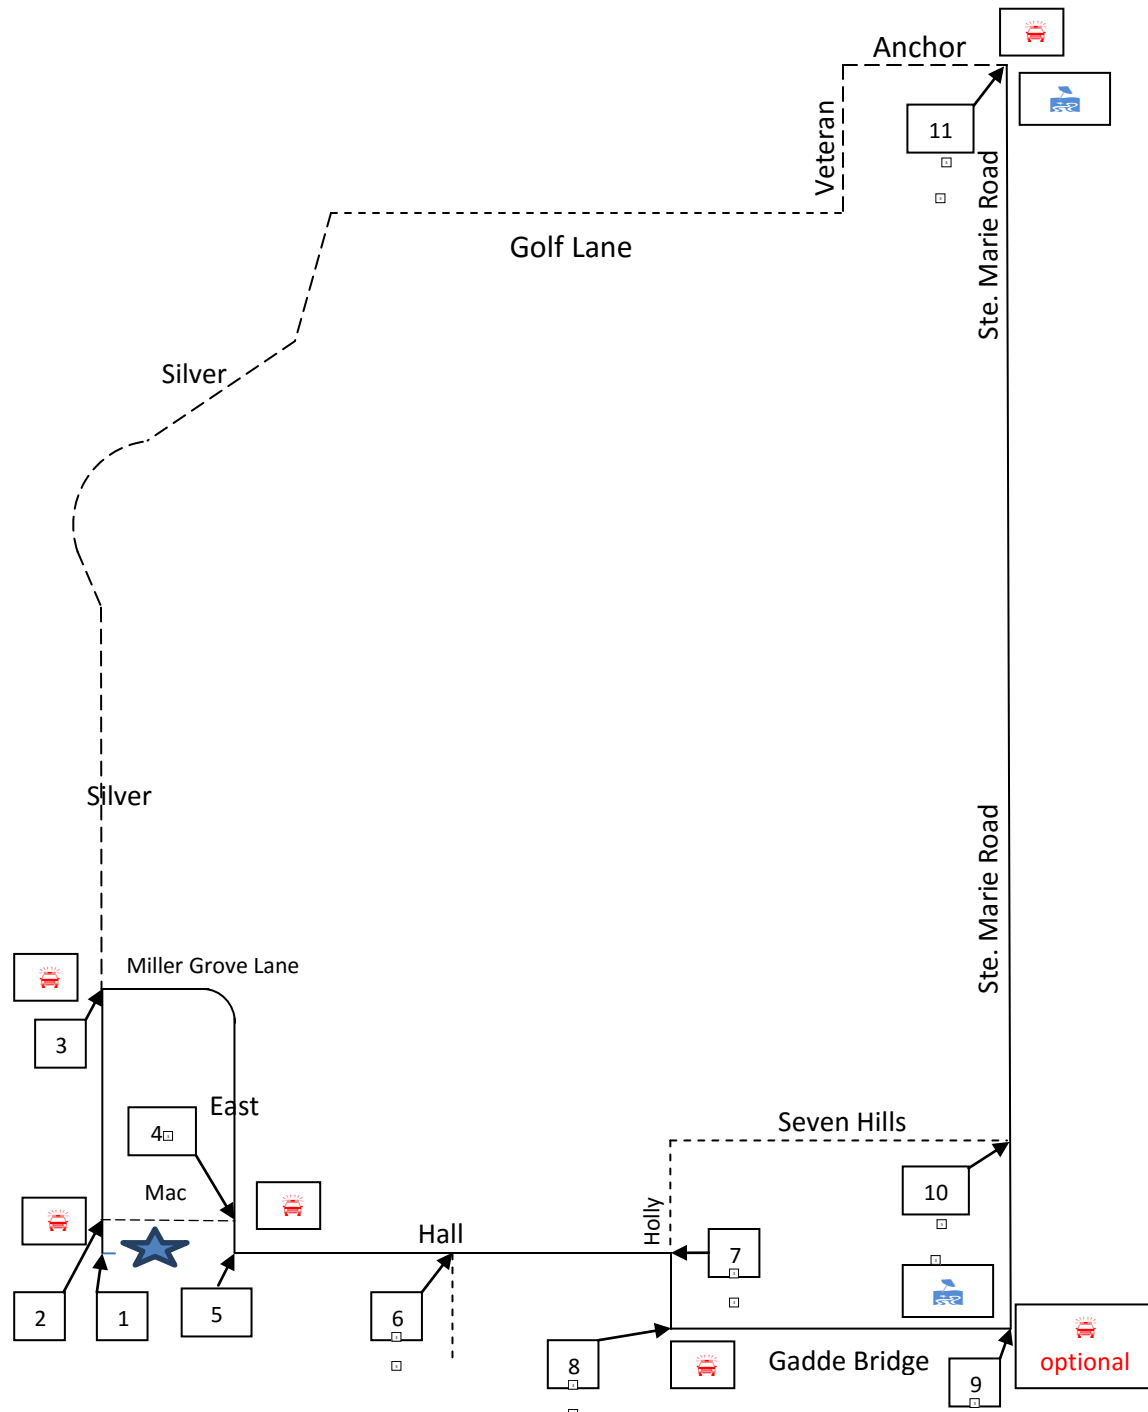

You have about 3 miles of great concrete road before the turn around, however there is not much of a shoulder. Be alert for traffic.

You'll cross the lake (2 sections) and after a bit you'll get to Anchor/Roth Fruit. Water will be available at the turn around.

This is a straight out and back, so at the bottom of the hill, turn right onto Gadde Bridge. More water here! At the T, turn right onto Holly, then a quick left onto Hall.

Follow Hall to East, another T, and go right, following East all the way around past the lake again, where East becomes Miller Grove Lane.

At Silver, make a left and head back on in to the Park – REMEMBER - there will be outgoing riders on that same section of Silver – play nice – share the road!

Why a different ride route?

The Silver/Miller Grove turn, where incoming riders cross left in front of outgoing riders has always been of concern, but the impetus for change is the gravel on Golf just after the turn off to Rotary Park, the gravel on Veteran, and the now completely gravel Anchor.

This route will have riders on both sides of Ste. Marie for a 3 mile stretch, the problem turn and the gravel are eliminated. Crossing Main & Rte 50 as was done in 2010 (not supported by law enforcement – or Committee) or going to Rotary Park and back (which would involve 2 way bike traffic on the dam) are not viable options; nor is using Mac and crossing Rte. 130.

RCRC White Squirrel Triathlon
RIDE ROUTE / 14.6 miles
(April 2016)

 law enforcement – follow their directions!
